## SUMMARY

Versatile Software Engineer with proven expertise in full-stack development, cloud technologies, and process automation. Skilled in modernizing legacy systems, building scalable APIs, and delivering business intelligence solutions. Recognized for collaborative teamwork, mentoring, and consistently driving efficiency across projects in agile environments.

## TECHNICAL SKILLS

**Frontend Development** - React | Next.js | Typescript | Javascript | XSLT

**Backend Development** - Java | Spring Boot | Spring Batch | AWS Lambda | REST APIs

**Miscellaneous** - AWS | Power BI | MySQL | MongoDB | Jenkins | Elasticsearch | Git-Hub Actions | Docker

## WORK EXPERIENCE

**Senior Software Engineer** [Principal Global Services]

Jul 2025 - Present

### Customer Experience Engineering

- Developed reusable custom React components adopted across the organization, improving UI consistency and development efficiency.
- Led efforts to prioritize and optimize the most business-critical UIs, significantly enhancing response times and user experience.

**Software Engineer** [Principal Global Services]

Jul 2022 - Jul 2025

### Reverse feed Files

Jul 2022 - Jun 2024

- Contributed to an Internal UI which is built on Dust and Femur framework for configuring file layouts, delivery methods, report frequency for reverse feed file generation.
- Built REST APIs using Spring Boot to persist configuration data in DB2 using MyBatis XML domain managers for efficient data handling
- Contributed to Spring Batch Application which generated different kind of reverse feed files based on the configuration selected in Internal UI and deliver these files to clients on scheduled basis.

### ESOP Money-out experience

Jun 2024 - Present

- Performed comprehensive analysis of legacy XSLT application to ensure seamless feature migration to a modern AWS, React, and Next.js stack.
- Designed a hybrid architecture with on prem data and cloud based application for seamless integration.
- Actively participated in architecture and service reviews to align the modern application with best practices and scalability requirements.

### Organization Metrics Initiative

March 2023 - Present

- Developed BI and analytics reports leveraging Jira, ServiceNow, and SonarQube integrations to provide insights on project tracking, on-call effectiveness, deployments, and code quality.
- Enabled data-driven decision-making by automating the extraction and visualization of key engineering metrics across environments.

## EDUCATION

Degree	Specialization	Institute	Year	CPI
B.Tech	Mechanical Engineering	VIT, Bhimavaram	2019-2022	8.45
Diploma	Mechanical Engineering	Andhra Polytechnic	2016-2019	8.4
SSC	-	Sunshine High school	2017	9.3

## HONOURS AND AWARDS

**PGS Annual Award 2023 - THE ROCKSTAR AWARD | PGS Annual Award 2024 - THE EXTRA MILE AWARD**

## CERTIFICATIONS

AWS Cloud Practitioner | AWS Solutions Architect | SRI- 111 Retirement Fundamentals

## INTERESTS

Cricket | Movies | Travelling | Books | Blogging
